-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.

DETAILED ACTION***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "colorful liquid" and accompanying structure must be shown or the feature(s) canceled from the claim(s) 7 and 10. No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3677

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "16" has been used to designate both "retainer mechanism 16" on page 4, line 13 and "clip device 16" on page 4, line 18. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Further, Applicant is required to carefully review the entire specification for errors of the type mentioned above and correct all locations in the specification so that the reference character and the term to describe that reference character is consistent throughout.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 3677

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because the term "disclosed" appears in line 1. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 8-9 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Johnson et al. (US Patent 4,879,882).

Regarding Claims 1-5 and 8-9, Johnson et al. disclose an apparatus for entertaining and pacifying a young child (Figure 7) comprising: a chain (24) that is securable and suspendable around the neck of a user; a retaining mechanism (25) connected to the neck device; and an interchangeable entertainment object (Figure 7) interchangeably and securely connected to the retaining mechanism within easy reach of a young child being held by the user, the interchangeable entertainment object being age appropriate and made of colors, materials and shapes that entertain and pacify a young child; re-claims 3,4 and 5 the interchangeable entertainment object would be attract children of all ages including less than three months to more than nine months; and re-claim 9, wherein the interchangeable entertainment object comprises shapes

Art Unit: 3677

(Figure 7), pictures (Figure 4), and letters (Figure 7) that can be used as a learning device (column 1, lines 45-48).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson et al.

Regarding Claim 6, Johnson et al. discloses all the claimed features as discussed in the rejection above except for specifically having the interchangeable entertainment object comprises contrasting primary colors. However, Johnson et al. recognizes that the color of the objects may be selected to match the wearer's ensemble (column 3, lines 1-2 and column 1, line 14) and this obviously could include combinations comprising of contrasting primary colors.

Claims 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson et al. in view of Mangan (US Patent 5,006,375).

Regarding Claims 7 and 10, Johnson et al. discloses all the claimed features as discussed in the rejections above except for the interchangeable entertainment object

Art Unit: 3677

containing a colorful liquid. However, Mangan teaches the use of placing liquid in an ornamental object (Abstract).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the device of Johnson et al. by including liquid inside an object in order to amuse a child.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lehmann et al. (4,581,904), Song (5,031,420), Hippely et al. (5,476,194), Nolan-Brown (5,950,888), Lim (6,170,127), Chen et al. (6,324,868) and Sagman (6,434,797).
